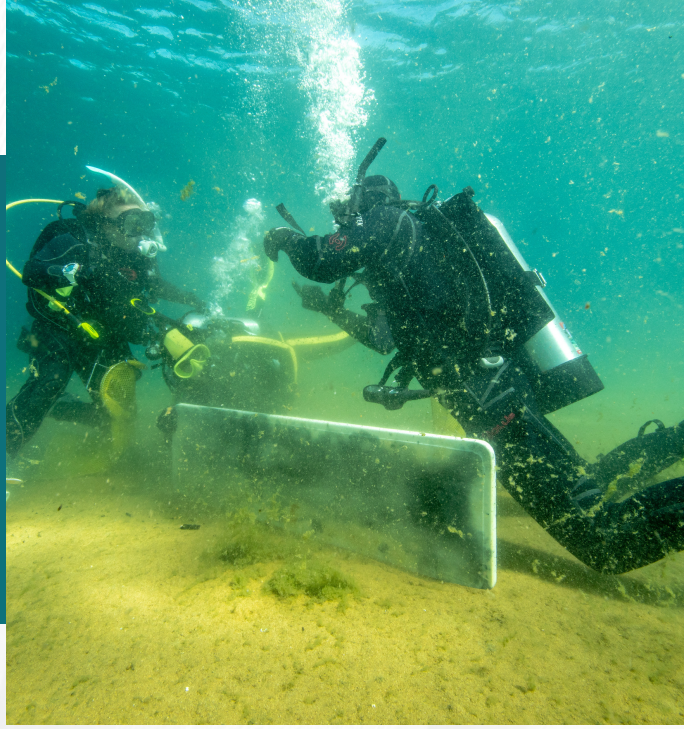
CLEAN UP THE LAKE

# ENVIRONMENTAL DIVEMASTER

Earn a professional level PADI Divemaster certification and gain the skills needed to lead a CUTL volunteer conservation dive program or be eligible for paid work assisting with conservation dive training courses.



## ENVIRONMENTAL STUDIES

Dive into a world of knowledge, broaden your horizons, and become an advocate for change as you take the plunge into the Environmental Divemaster Course. Learn the integral aspects of CUTL's conservation diving program methods and gain the expertise to implement and teach these techniques to others. Certified DM's have the opportunity to take on pivotal roles in CUTL conservation dive programs and projects including lead diver, safety diver, and data collection diver.

## COURSE COMPONENTS

- 8-12 hours of online PADI E-Learning
- EFR Training (if needed)
- Emerg. Oxygen Training (if needed)
- Approx. 50 hours to Complete
- Start course with atleast 40 dives and end course with atleast 60 dives

## PADI COURSE OBJECTIVES

A certified PADI instructor and PADI e-learning will provide the foundation of the following:

- Gain professional-level dive skills
- Start your scuba diving career
- Share your passion for aquatic preservation
- Mentor other divers
- Lead guided dives & assist with classes
- Give a dive briefing
- Conduct refresher training

## NEXT LEVEL DIVING

PADI Divemaster is the most popular and most recognized professional scuba certification in the world. Paired with a CUTL's environmental curriculum you will be empowered to make a real difference!
