CLEAN UP THE LAKE

ENVIRONMENTAL DIVER LEVEL III

Take your diving skills to the next level with PADI's Rescue Certification as well as learning advanced skills and methodologies used by CUTL conservation diving programs and projects.

ENVIRONMENTAL STUDIES

This intensive curriculum is designed to enhance rescue skill development specific to conservation diving. This includes related safety techniques and rescue scenarios crucial for addressing real-life situations that may be encountered during conservation diving projects. Divers who have not taken other CUTL courses will also have access to environmental curriculum covered in Env. Diver I & II.

PADI COURSE OBJECTIVES

A certified PADI instructor and PADI e-learning will provide the foundation of the following:

- Be a better dive buddy
- Improve your navigation skills
- Enroll in a divemaster course
- Help other divers
- Fix minor gear issues
- Use an emergency oxygen kit

COURSE COMPONENTS

- 8-12 hours of online PADI E-Learning
- EFR Training (if needed)
- Emerg. Oxygen Training (if needed)
- 4-5 Skill Development and Training Dives
- Field Demonstrations
- Self Study: CUTL Protocols & Procedures

NEXT LEVEL DIVING

This course is regarded as the most fun PADI skills course. We are confident you will agree! This course will expand your confidence as a diver and will ensure you are the best dive buddy you can be!
